

Myślenice, 14th April 2020

Dear Sir or Madam,

TFKable Group communication update on the SARS-CoV-2 virus Coronavirus COVID-19:

TELE-FONIKA Kable SA continues to closely monitor information related to the status of the SARS-CoV-2 virus pandemic; this includes the recommendations and instructions of local, national and international organisations.

The TFKable Group are working closely with raw material and consumables suppliers, in both the domestic and global supply chains. New procedures have been introduced improving communication, ensuring the fastest possible response to any supply issues. To date, these actions are proving effective, mitigating risk and maintaining production continuity, ensuring on-time order completion. Whilst we acknowledge the dynamic situation may result in delivery deadlines being revised, our comprehensive response to the pandemic will minimise any disruption.

In addition to maintaining our production capability, we are systematically introducing new procedures to further protect our employee's health and safety. Many of these actions exceed the current local and national institutions guidelines.

As of 14th April 2020, these health protection procedures and preventive contingency measures are proving both appropriate and effective; without impacting on the TFKable Group operational activities.

The latest situation can also be found on our TFKable Group website, or contacting us by email or phone.

For the latest national and international guidelines on COVID-19, please refer to following government and organisation websites:
