

Myślenice, 20th May 2020

Dear Sir or Madam,

TFKable Group communication update on the SARS-CoV-2 virus Coronavirus COVID-19:

TELE-FONIKA Kable SA continues to closely monitor all information related to the status of the COVID-19 pandemic; this includes the recommendations and instructions of local, national, and international organizations.

From the very beginning, TFKable Group has been closely following epidemiological threat situations in the country and abroad. The Group companies and production plants have implemented a number of preventive procedures aimed at minimizing the effects of the spread of the virus whilst we have been under stricter regulations. We are now currently adopting guidelines and processes applicable to a gradual reduction of restrictions in public spaces, and maintaining recommendations on occupational safety at the required level; this involves constantly conducting regular safety bulletins through internal newsletters, which provide employees with the latest news and resources on COVID-19.

Particular attention is being paid to activities in TFKable Group companies, with priority focused on the health and safety of employees, continuity of production and orders, minimizing supply chain disruption, and preserving financial liquidity. The introduction of standards of cooperation with partners whose goal is to mitigate risks in the area of delivery deadlines are constantly being adapted to the current dynamic situation.

As of 20th May 2020, the health protection procedures and preventive measures that we have introduced are proving to be effective, whilst not impacting TFKable Group operational activities.

It is worth emphasizing that the attitude of employees and business partners of the TFKable Group companies has allowed for appropriate changes to be made to operational processes whilst both continuing with current business objectives and maintaining high safety standards.

Please follow the update on our website or contact us by email or phone.
